Kaan Hascan

Software Developer

Istanbul, Turkey | +90 530 688 45 00 | kaanhascann@gmail.com
github.com/kaanhascan | linkedin.com/in/kaan-hascan

Profile

Junior Software Developer with a Bachelor's degree in Software Development (GPA: 3.05) and hands-on enterprise internship experience. Skilled in building scalable backend architectures, RESTful APIs, and full-stack applications using Java (Spring Boot) and NestJS. Passionate about writing clean code and building efficient applications.

Education

Yeditepe University — Istanbul, Turkey
B.Sc. in Software Development (Faculty of Computer and Information Sciences) – ***GPA: 3.05 / 4.00*** — *2021 – 2025*

- **Relevant Coursework:** Object-Oriented Programming (Java & C#), Database Management Systems (SQL), Data Structures & Algorithms, Web Development, Software Engineering & Testing.

Professional Experience

EnerjiSA — Istanbul, Turkey
Software Intern — *08/2025 – 09/2025*

- Engineered scalable backend services and server-side structures using **ASP.NET**, **Node.js**, and Python.
- Contributed to the development of a **Model Context Protocol (MCP) Server** project, facilitating seamless cross-technology and service integrations.
- Managed and optimized data flows and enhanced backend performance for the MCP Server.

AIFTEAM — Istanbul, Turkey
Software Intern — *07/2024 – 09/2024*

- Assisted in developing enterprise backend solutions for **SAP B1** integrations utilizing **C#** and **Microsoft SQL Server**.
- Optimized complex SQL queries and data manipulation processes, ensuring high data integrity across enterprise systems.

Projects

Veyzo – Asynchronous Batch Video Processing Platform — 2026

Java 21, Spring Boot, React, PostgreSQL, Docker, FFmpeg | github.com/veyzo-backend | github.com/veyzo-frontend

- Architected and developed a full-stack web application capable of handling asynchronous batch video processing and media conversions using **Java 21**, **Spring Boot**, and **FFmpeg**.
- Implemented non-blocking task queues and RESTful endpoints to process multiple media streams concurrently without degrading server performance.
- Containerized backend services and **PostgreSQL** database with **Docker**, and built a responsive **React (Vite)** frontend to monitor real-time job statuses.

Tarladan – Farmers Market Mobile App — 2024 – 2025

NestJS, PostgreSQL, React Native, REST APIs | github.com/TarladanApp

- Co-founded and engineered a mobile platform connecting agricultural producers directly with consumers to minimize intermediary costs.
- Designed and implemented the backend architecture, authentication flows, and relational database schemas using **NestJS** and **PostgreSQL**.
- Awarded **2nd Place** in the Yeditepe University Entrepreneurship Competition for innovative technical and business execution.

Technical Skills & Languages

Languages: Java, C#, JavaScript, TypeScript, SQL, HTML5/CSS3
Frameworks & Libraries: Spring Boot, ASP.NET Core, NestJS, Node.js, React, React Native
Databases & Tools: PostgreSQL, Microsoft SQL Server, Docker, Git, GitHub, FFmpeg, Postman
Core Competencies: Backend Development, RESTful APIs, OOP, Data Structures & Algorithms
Spoken Languages: Turkish (Native), English (B2 – Upper Intermediate)
